Exciting, Lasting Change

Make it Stick

- Knowledge is NOT power. The effective, habitual use of knowledge is power
- We use training techniques to create “sticky,” **SUB**conscious change

Change Principles

New Mind-, Skill- & Behavior-sets

- Optimism Bias: Studies show we are not as good as we think we are. And...
- Neuroscience shows that our skills, habits & behaviors come from our **sub-conscious** brain, not our *conscious* brain
- Most training only introduces *information* into our *conscious* brain. This is why most training results in no change. **BUT not with us...**
- We will train you with exercises that begin inserting new, optimized mind- & behavior- & skill-sets into your **subconscious** brain

Accept that We are Naturally Insane

- Einstein said “insanity is doing the same thing over & over, expecting a different result”
- We all want & need more, which requires getting more *from* ourselves, which requires...
- ...new, improved mind-, behavior-, & skill-sets

Most Training Changes Nothing

- We won't waste your time, as most training does, with information-dump. We'll help you literally rewire your subconscious brain for new, optimized mind-, behavior- & skill-sets
